

Joint Value Proposition Brief

Anapaya and InterCloud join forces to deliver resilient cloud connectivity

Anapaya and InterCloud come together in a strategic partnership aimed at revolutionizing secure connectivity in the digital age. By combining Anapaya's groundbreaking network security solutions based on the SCION architecture, with InterCloud's range of end-to-end managed connectivity services and robust cloud connectivity platform, we are empowering organizations to navigate the digital world with confidence and resilience.

The challenges we tackle

Cybersecurity threats:

Organizations face an ever-evolving landscape of cyber threats, including malware, ransomware, and data breaches.

Data privacy compliance:

With the increasing prevalence of data privacy regulations such as GDPR and CCPA, organizations must ensure compliance when transferring sensitive data across networks and cloud environments.

Network performance optimization:

In today's digital economy, organizations rely on fast and reliable network connectivity to support their business-critical applications and services.

Interoperability challenges:

Organizations often struggle with interoperability issues when connecting disparate systems and cloud environments.

Global connectivity requirements:

As organizations expand their operations globally, they require scalable and reliable connectivity solutions that can support their international growth.

Management complexity:

Managing network security and cloud connectivity solutions separately can lead to increased complexity and administrative overhead for IT teams.

Our offerings

With SCION connection from Anapaya, InterCloud's SD-CI platform helps enterprises to control and deliver visibility across their global connectivity.

Anapaya's SCIONabled solutions:

Anapaya's solutions powered by SCION deliver an unprecedented network security framework designed to provide secure, reliable, and efficient communication over the internet. SCION achieves this by fundamentally rethinking how networks are architected, with a focus on end-to-end security, control, and resilience.

InterCloud's Cloud Connectivity Platform with end-to-end managed connectivity services:

Alongside a fully comprehensive range of end-to-end managed connectivity services, InterCloud's end-to-end global connectivity platform eliminates the complexity of deploying the cloud. The result? Businesses gain full control over the security, sovereignty, and performance of their critical data traffic with complete peace of mind.

InterCloud's offering enables businesses to connect their on-premises infrastructure, data centers, and cloud environments seamlessly supporting customers around the world to achieve scalable, high-performing connectivity to any cloud destination.

Empowering businesses

The Anapaya-InterCloud partnership represents a transformative step forward in secure connectivity, offering organizations the agility, reliability, and peace of mind they need to succeed in the digital era. Together, we are redefining the future of networking, one secure connection at a time.

Enhanced security:

Through the integration of Anapaya's SCION-based solution with InterCloud's cloud connectivity platform, organizations can achieve unparalleled security for their data and applications. SCION's innovative approach to network security ensures end-to-end encryption and authentication, protecting against cyber threats and unauthorized access.

Simplified management:

By consolidating network security and cloud connectivity services into a unified solution, the Anapaya-InterCloud partnership streamlines management and reduces complexity for IT teams. With centralized visibility and control, organizations can efficiently manage their network infrastructure while maximizing productivity and resource utilization.

Scalable connectivity:

The Anapaya-InterCloud partnership offers organizations scalable and reliable connectivity solutions tailored to their unique needs. Whether connecting remote offices, data centers, or cloud environments, our joint offering provides seamless connectivity with optimized performance and minimal latency.

Global reach:

Leveraging InterCloud's extensive global network of cloud service providers and Anapaya's international presence, organizations can expand their reach and scale operations globally with confidence. Our partnership enables seamless connectivity across geographic boundaries, empowering businesses to compete and thrive in today's interconnected world.

Regulatory compliance:

Both Anapaya's SCION solution and InterCloud's cloud connectivity platform help businesses maintain regulatory compliance by providing secure and compliant communication channels. SCION's encryption and authentication mechanisms ensure data privacy and integrity, while InterCloud's connectivity solutions facilitate compliance with data protection regulations by enabling secure data transfer and access controls.

Overall, the partnership between Anapaya and InterCloud offers businesses a comprehensive solution for secure, reliable, and efficient communication across distributed environments. By combining the strengths of both technologies, businesses can address a wide range of networking and security challenges while unlocking new opportunities for innovation and growth.

About Anapaya

Anapaya is a Swiss company that strives to enhance internet security and connectivity through the SCION Internet architecture, a groundbreaking technology offering secure routing, resiliency against DDoS attacks, and high availability.

Anapaya's solutions empower global businesses to operate with confidence in today's world by delivering higher security and flexibility for their business-critical services and data communication.

Together with its partner ecosystem of telecommunication companies, system integrators and cloud providers, Anapaya is making the SCION Internet accessible to everyone.

Anapaya was founded in 2017 and is headquartered in Zürich, Switzerland.

About InterCloud

InterCloud's end-to-end global connectivity platform eliminates the complexity in deploying the cloud, giving businesses full control over the security, sovereignty, and performance of their critical data traffic with complete peace of mind.

Working with organisations to help them transform global connectivity, reduce network complexity, and accelerate growth and innovation, InterCloud is a trusted advisor to some of the world's leading brands when it comes to leveraging the cloud for future success.

With offices across Europe, the company's platform is underpinned by its team of cloud experts who guide customers to implement effective strategies to leverage the power of the cloud across their organization – making global connectivity a driver for business performance.
