>> InterCloud Smart Cloud Connectivity as Code to Leverage AWS Direct Connect benefits. >>>>>>>>

AWS Direct Connect Service Delivery Partner

InterCloud, the European Software Cloud Interconnect Provider, has partnered with AWS since 2012. Getting the highest level of partnership named Technology Advanced, InterCloud has also joined the AWS Service Delivery Program in 2019 and the Software and Service Path since 2022. InterCloud is definitely a reference on the AWS landscape. Providing a fully managed service - backed by strong SLAs- InterCloud deliver agile, flexible, seamless and secured connectivity to all you private resources. AWS Direct Connect provides key benefits such as elasticity, consistency and is compatible with all AWS Services. It can be associated with AWS Transit Gateway too, and AWS Cloud WAN.

Bridge the gap | Between fast-paced AWS cloud innovation and slow modernization of network infrastructure.

>> CUSTOMER REQUIREMENTS

- Shorten time-to-market (spreading microcomponents amongst different cloud environments).
- Simplify, accelerate and scale up interconnections without soaring network costs.
- Guarantee amazing end-user experience, thus performance of their business-critical traffic.
- Control & secure the cloud network.

>> BENEFITS

- Accelerate infrastructure modernization in the long run.
- Simplify network services consumption and increase network agility at scale.
- Increase visibility & control for all DevSecOps stakeholders, complying with industry and corporate policies.
- Streamline IT network & cloud operations.

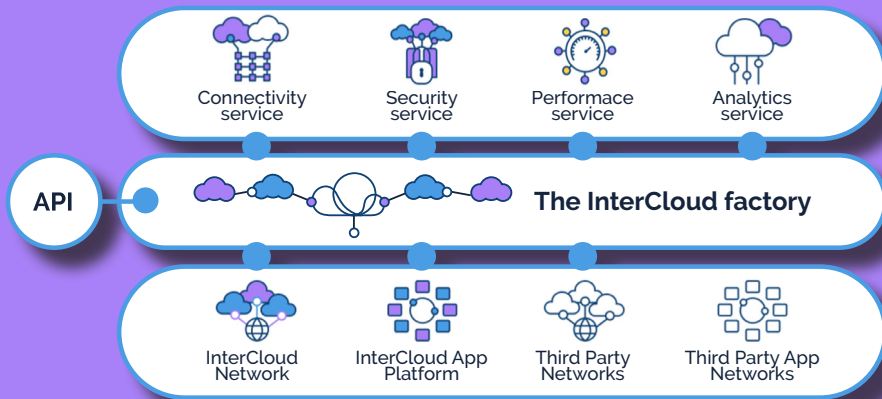

The InterCloud platform

Fully managed end-to-end connectivity

- The InterCloud Platform offers granular service components designed to match with the cloud providers' direct connectivity services.
- The InterCloud Fabric is composed of our private backbone as well as the network intelligence capabilities from Smart Edges.
- We build, operate and maintain a private resilient backbone, based on multiple infrastructures and platforms to deliver end-to-end services.

Interconnect aaS - A Scalable Managed Solution

Private Connectivity

Guaranteed end-to-end performance and security of business-critical application.

Traffic isolation of each flow using the cloud providers' private connectivity services.

Managed Peering

Optimise the performance of SaaS applications accessed via the internet.

Fully managed internet. Exchange peering design and implementation.

Secure Service Hubs

Improve your infrastructure agility.

Managed multi-modal connectivity (private IX peering, IP transit, etc.) and advanced services for network, security or policy administration.
