

# >> Jump-start your connectivity with Google Cloud Platform and InterCloud. >>>>>>>>>>

**Google Cloud  
Partner Interconnect  
Carrier Peering  
Partner**

InterCloud, the European Software Cloud Interconnect provider, has partnered with Google since 2015.

InterCloud provides a fully managed service — backed by strong SLAs — to deliver agile, flexible and secured connectivity to your public and private Google Cloud resources.

## **Bridge the gap**

between fast-paced Google Cloud innovation and slow modernization of network infrastructure

### >> CUSTOMER REQUIREMENTS

- Shorten time-to-market (spreading microcomponents amongst different cloud environments).
- Simplify, accelerate and scale up interconnections without soaring network costs.
- Guarantee amazing end-user experience, thus performance of their business-critical traffic.
- Control & secure the cloud network.

### >> BENEFITS

- Accelerate infrastructure modernization in the long run.
- Simplify network services consumption and increase network agility at scale.
- Increase visibility & control for all DevSecOps stakeholders, complying with industry and corporate policies.
- Streamline IT network & cloud operations.

**Companies choose InterCloud  
for their Google Cloud  
end-to-end network solution**

# Interconnect as-a-Service

**InterCloud is the Software-Defined Cloud Interconnect (SDCI) provider delivering a secure, end-to-end managed service.**

Our API-first platform simplifies and accelerates customers' network operations, offering enhanced performance and visibility..

InterCloud Autonomi natively offers usage-driven, granular traffic segmentation to make cloud networking an integral part of applications that can be easily monitored, controlled and optimized.

**InterCloud Google Connector, an on-the shelf-product, provides:**

- >> Layer 3 connectivity: InterCloud Google Connector uses the industry-standard, dynamic routing protocol (BGP) to exchange routes and provide dynamic routing.
- >> SLA: InterCloud manages end-to-end connectivity to Google Cloud with strong performance commitments to KPIs (such as latency, jitter and packet loss).
- >> Seamless scalability across the globe.

## Accelerating Google Cloud Apps Usage & large-scale projects everywhere
